

Rule 6 Note on Survey Data for Ancient and Veteran Trees: Appendix 1 - measurements

Proof the stick is 1.5m long.

Tree 1 OAK: Original Measurement 3.5m measured below the split, including bulge. Check measurement 9/1/21: 3.13m excluding bulge.

Tree 2 OAK: Original Measurement 3.35m measured below the split. Check measurement 9/1/21: 3.4m

Tree 3 HAWTHORN: Original measurement 1.8m, measured 80cm from ground at back of tree. Check measurement 9/1/21: 1.96m at 80cm, below split.

Tree 4 OAK: Original Measurement 3.3m measured below the split. Check measurement 9/1/21: 3.13m excluding bulge.

Tree 5 HAWTHORN: Original Measurement 1.3m measured below the split, but was a complicated tree to measure.
Check measurement 9/1/21: 1.37m

Tree 6 OAK: Original Measurement 3.15m measured below the split. Check measurement 9/1/21: 2.8m, but measured at narrowest point (see picture).

Tree 7 OAK: Original Measurement 3m (measured 1.5m from ground on shortest side). Check measurement 9/1/21: 2.59m

Tree 8 SILVER BIRCH: Original Measurement 4m measured 0.5m above ground level. Check measurement 9/1/21: 3.3m, measured below widening of trunk.

Tree 9 HAWTHORN: Original Measurement 1.8m measured below the split, but was a complicated tree to measure. Check measurement 9/1/21: 1.98m measured below split.

Tree 10 OAK: Original measurement 5.3m, measured below split. Check measurement 9/1/21: $4.9\text{m} + 0.45\text{m} = 5.35\text{m}$ (tape measure wasn't long enough, so 2 off tape measures used).

Tree 11 HAWTHORN: Original measurement 1.38m, measured 1m above ground level. Check measurement 9/1/21: 1.39m measured at 0.64m above ground level but below bulge in tree. Complicated tree to measure.

Tree 12 HAWTHORN: Original measurement 2.28m, measured 0.5m from back of tree below split. Check measurement 9/1/21: 2.33m measured below split.

Tree 13 OAK: Original measurement 3.2m, measured at 1m from ground at back of tree. Check measurement 9/1/21: 3.08m measure 1.5m from ground at back of tree.

Tree 14 HAWTHORN: Original measurement 2.15m, measured 0.5m from back of tree below split. Check measurement 9/1/21: 1.85m measured below split.

Tree 15 HAWTHORN: Original measurement 1.8m, measured 0.5m from ground level at back of tree below split. Check measurement 9/1/21: 1.83m measured below split 0.49m from ground level at back of tree.

Tree 16 ALDER: Original measurement 3.5m, measured 1.5m from ground level. Check measurement 9/1/21: 3.36m measured 1.5m from ground level.

Tree 17 HAWTHORN: Original measurement 1.5m, measured 0.5m from ground level at back of tree below split. Check measurement 9/1/21: 1.70m measured below split 0.5m from ground level at back of tree.

Tree 18 OAK: Original measurement 3.7m, measured at 0.5m from ground at back of tree below split. Check measurement 9/1/21: 3.8m, measured at 0.46m from ground at back of tree below split.
